635 PHELAN AVENUE

SAN JOSE, CALIFORNIA 95112

MARCH 1977

PRESIDENT'S LETTER

Please mark your calendar for March 23 at 7:30 PM for our general membership meeting. Carolyn deVries of the Sourisseau Academy will present the program. Coffee and cookies will be served.

The annual Stable Stomp will be held on Friday night, May 13th. I hope you will be able to attend as this is one of our most successful and enjoyable activities. There will be square dancing for beginners and experienced dancers. Ernie Renzel has a special surprise for all of those attending.

Your Association Board of Directors has agreed to purchase the ornamental railing to be put around the top of the Pacific Hotel and to assist in funding the street lamp project headed by Jim Arbuckle. Jim, incidentally, is one of the hardest working museum supporters we have and deserves our support. Thank you, Jim, for all the time you have spent on the museum and other historical projects for our community.

The Board has decided to continue the publication program another year and we are investigating presenting a collection of old Santa Clara County photos. If any of you are interested in helping put this book together, please contact me.

CURRENT & CURRENCY

How to Save Both

IT isn't the light you use, it's the light you waste that counts.

You can have all the light you need—and still save money—by using HYLO MAZDA—it turns down.

HYLO MAZDA lamps save their cost 4 to 5 times over since they save more than $\frac{3}{4}$ of the Electricity when turned low.

The "Lo" light of HYLO is enough for rooms not actually occupied evenings.

"A Little Light All Night is Right" for Halls, Bath Room, Nursery, Sick Room and that dangerous turn in the Stairs. It is protection and comfort combined—ininitely better than stark darkness in these times.

HYLO, when turned low, can be flashed into full MAZDA brilliancy instantly, at the touch of a string.

HYLO can be purchased from practically every Electric Dealer and Electric Light Company. Also Hardware and Department Stores.

HYLO uses one-quarter the Electricity consumed by Resistance Devices.

HYLO MAZDA—Price \$1
HYLO Carbon—80c
20 or 32 candle power each, turns down to one candle power. 28 to 32 volts for Private Home and Farm Plants.

Every HYLO is Guaranteed—Money back if wanted.
